min thick 0.009	min thick 0.007	min thick 0.009
max thick 0.25	max thick 0.016	max thick 0.75

What makes mail non-machinable?

- Applies to Standard Class & First-Class letters
- * If aspect ratio less than 1.3 or more than 2.5 (aspect ratio length divided by height based on address orientation)
- * If piece is less than .009 thick
- * If Delivery Address is parallel to the shorter dimension
- * Folded self mailers - if not folded or tabbed to regulations
- * If pieces weighs more than 3.3 ounces
- * If the piece is rigid (not flexible)
- * If the piece is not uniform in thickness (based on regulations)
